Purpose

The Federal Financial Management (FFM) Business Use Cases reflect the business needs, or requirements that an agency must follow in the financial management community. This document is part of the FFM Business Use Case Library and contains the business use cases associated with the Apply-to-Repay Business Process. The Federal Financial Management Business Use Case Library Overview should be referenced in conjunction with this document for guidance on understanding and applying the FFM Business Use Cases to agency financial operations.

Appendix A provides a list of the documents in the FFM Business Use Case Library.

Business Use Case Structure

The sections of the FFM business use cases are described below.

Business Use Case Identifier: includes information about the key underlying components. The notation for a business use case identifier is as shown.

Figure 1: The notation for a business use case identifier.

Business Scenario(s) Covered: identifies differing situations or conditions that occur when executing an end-to-end business process and reflect the scope and complexity of federal government agency missions.

Business Actor(s): identifies the typical offices or roles performing events in the business use case.

Synopsis: provides a summary of the events that take place within the business use case.

Assumptions and Dependencies: includes context information about events that have occurred prior to the first event identified in the business use case or outside of the business use case and dependencies on events accomplished in other business use cases. There are several common assumptions that are established for all business use cases. Additional assumptions or dependencies are included if needed for the specific business use case.

FFMSR ID Reference(s): includes a list of the Federal Financial Management System Requirements (FFMSR) that apply for the business use case.

Initiating Event: identifies the event that triggers the initiation of the business use case.

Typical Flow of Events: includes the Federal Financial Management (FFM) and non-FFM events that may occur to complete the business scenario(s) included in the business use case. The non-FFM events are provided for business context. Also included are the inputs and outputs or outcomes that one would expect to occur during or as a result of the event.

Apply-to-Repay Business Use Cases

110.FFM.L2.01 Federal Government Direct Loans Subject to Credit Reform

End-to-End Business Process: 110 Apply-to-Repay

Business Scenario(s) Covered

- Disbursement of a Loan
- Establishment of Principal Receivable
- Interest Accrual
- Collection of Interest and Principal

Business Actor(s)

Finance Office, Federal Agency Lender; Non-Federal Borrower (e.g., a small business)

Synopsis

A Federal Agency Lender makes an unsecured direct loan to a Non-Federal Borrower. The Federal Agency Lender disburses the loan, accrues interest and collects principal and interest from the Non-Federal Borrower. The Federal Agency Lender provides loan-related information for reporting to the Non-Federal Borrower.

Assumptions and Dependencies

- 1. There may or may not be automated (near/real-time or batch) interfaces between functional areas/functions/activities or between provider solutions/systems.
- 2. There is no presumption as to which activities are executed by which actor, or which activities are automated, semi-automated, or manual.
- 3. Supporting information for general ledger transactions includes sub-ledger entries when sub-ledgers are used.
- 4. Appropriate attributes (e.g., object class and project) are included as part of the accounting string.
- 5. Relationships between use cases are described in the Framework for Federal Financial Management Use Cases found in the related overview document.
- 6. All predecessor activities required to trigger the Initiating Event have been completed.
- 7. Funds availability checks are performed against appropriations/fund accounts for obligating funds, and against obligations for disbursing funds in accordance with OMB A-11, Section 150.2.
- 8. The loan approval and loan documentation contain the terms and conditions of the principal, interest, and administrative fees.
- 9. The borrower has already been set up in the FM system.
- 10. The loan transactions are provided to the FM System on a per loan basis.
- 11. The borrower's loan repayments are processed through a Treasury central service (e.g., lockbox or online payment system).
- 12. The loan is subject to the Federal Credit Reform Act.
- 13. The federal agency has received borrowing authority to cover the loan.
- 14. The federal agency has already calculated loan value, subsidy cost and administrative expense.
- 15. The federal agency has received appropriated funds for initial subsidy cost and administrative expense.
- 16. The periodic subsidy re-estimate activity and FM impacts are performed by a different business process.
- 17. The federal agency has already borrowed the necessary funding from Treasury or Federal Financing Bank.
- 18. The federal agency has already obligated the funds for the loan program including the obligation for the subsidy expense.
- 19. Money borrowed to cover the loan and the subsidy expense are already in the financing account.
- 20. Tolerance percentages or amounts between expenditure and obligation amounts have been established.

110.FFM.L2.02 Federal Government Guaranteed Loans Subject to Credit Reform

End-to-End Business Process: 110 Apply-to-Repay

Business Scenario(s) Covered

- Aggregated Loan Portfolio
- Default on Government Guaranteed Loan

Business Actor(s)

Finance Office, Federal Agency: Lender, Borrower

Synopsis

Loans made to private sector borrowers (Borrower) by a private sector lender (Lender) are guaranteed by a federal agency (Guarantor). One guaranteed loan is subsequently found to be in default. A guaranteed loan default claim is filed with the federal agency and a default claim payment is made to the Lender. The Borrower's pledged asset is foreclosed, and is purchased at the foreclosure sale and pledged as collateral for the federal agency's guarantee of the portfolio. The difference between the value of the asset and the guarantee outlay is not collected from the Borrower after a failed attempt by the Guarantor. The debt is referred to the Treasury for collection.

Assumptions and Dependencies

- 1. There may or may not be automated (near/real-time or batch) interfaces between functional areas/functions/activities or between provider solutions/systems.
- 2. There is no presumption as to which activities are executed by which actor, or which activities are automated, semi-automated, or manual.
- 3. Supporting information for general ledger transactions includes sub-ledger entries when sub-ledgers are used.
- 4. Appropriate attributes (e.g., object class and project) are included as part of the accounting string.
- 5. Relationships between use cases are described in the Framework for Federal Financial Management Use Cases found in the related overview document.
- 6. All predecessor activities required to trigger the Initiating Event have been completed.
- 7. Funds availability checks are performed against appropriations/fund accounts for obligating funds, and against obligations for disbursing funds in accordance with OMB A-11, Section 150.2.
- 8. The Lender is in good standing under the laws of its state of origination, an approved lender qualified to issue federal guaranteed loans, and is not in default under any agreements with the Federal Agency Loan Guarantor.
- 9. The Lender has qualified Borrowers for guaranteed loans and has completed loan settlements and disbursements and is qualified to issue federal government guaranteed loans.
- 10. The federal agency has already obligated the funds for the default claim for the guaranteed loan program.
- 11. Financial information is provided to the FM system on a loan portfolio level (i.e., not on a per loan basis).
- 12. The periodic re-estimation of liability and subsidy expenses is performed periodically in a different business process.
- 13. On default, a loan is removed from the pool and managed individually for guaranteed loan default claims.
- 14. An initial liability and subsidy expense for the guaranteed loan portfolio has already been posted in the FM system.
- 15. Tolerance percentages or amounts between expenditure and obligation amounts have been established.
